Radwin is a worldwide provider of carrier class radio applications that meet today's budgets and the technical needs of tomorrow. Our product line features unlicensed radios that are flexible enough to fit any

circumstances eliminating the need for expensive, licensed radios. We will discuss a wide variety of advantages over traditional applications and a wide variety of solutions to meet the challenging needs of the Broadcaster.

Jim Guido - Has over 25 years of successful Telecom management experience, with Lucent Technologies, AT&T, Spectra Logic and SkyOptics. Jim has held positions in sales, marketing, and product management including VP of Sales and Marketing for the ICDD Division at Lucent Technologies and Branch Manager for AT&T Computer Systems.

Jim holds a Bachelor of Arts Degree in Political Science from Loyola University-Chicago and founded, taught, and was Associate Director of the Telecom/LAN Program at DePaul University for 11 years.
